DIGITAL LITERACY

(PROJECT REPORT)

Name: Pratush Kandar

Branch: Integrated M.Tech AI

Reg No.: 25MIM10157

1. INTRODUCTION

In today's digital era, having strong digital literacy skills is essential for academic, professional, and personal growth. Digital literacy includes the ability to use digital tools effectively, communicate online professionally, and stay safe on the internet.

This project aims to enhance these skills through practical tasks involving various platforms and tools. It provides hands-on experience in areas such as online communication, cybersecurity awareness, and digital content creation.

2. TASK 1: DIGITAL LITERACY INFOGRAPHIC

In Task 1, an infographic was created using Canva to represent the concept of digital literacy. The infographic covered key areas such as safe internet practices, digital tools, and maintaining a professional online presence.

This task helped in understanding how to present information visually in a clear and engaging manner. It also improved creativity and design skills.

3. TASK 2: DIGITAL PORTFOLIO

In this task, professional profiles were created on platforms such as GitHub, LinkedIn, and Kaggle. These platforms are essential for building an online presence and showcasing technical skills. Through this task, I learned the importance of maintaining a professional digital identity and how to present my skills effectively to potential employers or collaborators.

4. TASK 3: PLATFORMS AND GOOGLE FORM

Task 3 involved solving a coding problem on HackerRank and creating a Google Form quiz. The quiz included multiple-choice and short-answer questions related to digital awareness.

Additionally, responses were linked to Google Sheets for analysis. This task improved my understanding of online assessment tools and data collection.

5. TASK 4: EMAIL AND DIGITAL ETIQUETTE

In this task, two professional emails were drafted: one requesting an assignment extension and another applying for an internship. A social media checklist was also created, highlighting do's and don'ts for responsible online behavior.

This task emphasized the importance of professional communication and maintaining proper etiquette in digital interactions.

6. TASK 5: CYBERCRIME AWARENESS

This task focused on understanding cybercrime through a case study on UPI fraud. The case study explained how cybercriminals use social engineering techniques to trick users into transferring money.

A prevention checklist was also prepared to highlight safety measures such as not sharing OTPs or UPI PINs and verifying requests before taking action. This task increased awareness about online threats and preventive measures.

7. CONCLUSION

This project significantly improved my digital literacy skills. I gained practical knowledge about using digital platforms, maintaining online safety, and communicating professionally. These skills are essential for my future academic and professional journey.
